Bird Routes of Baradine and the Pilliga Forest

Glossy Black Cockatoo (an endangered species) are common in the Pilliga Forest.

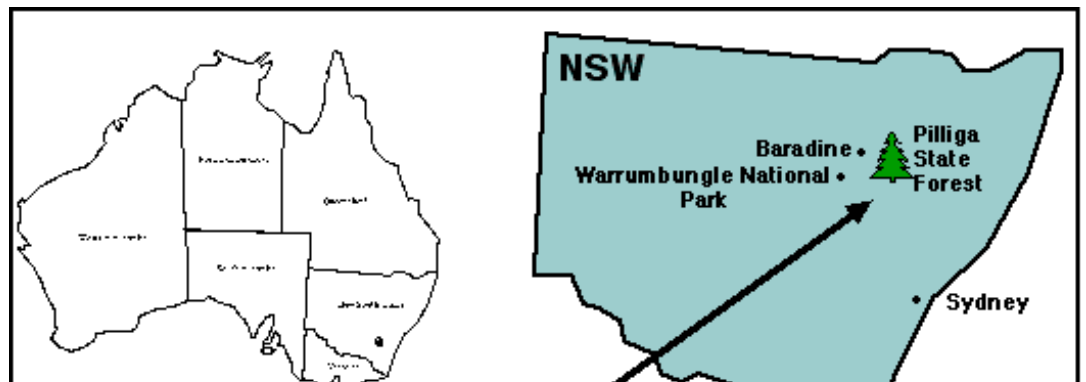

Baradine - Gateway to the Pilliga

BARADINE WELCOMES YOU AND HOPES THAT YOU WILL ENJOY WHAT WE HAVE TO OFFER.

Between the foothills of the Warrumbungle Mountains, the Great Western Plains and the vast forests of the Pilliga, lies a series of richly rewarding and readily accessible bird trails.

This site was researched and designed by David Johnston - a well known birding personality of Baradine. To contact him send an email to his son Tony Johnston at:
tonyjohnston1@bigpond.com

These trails have been chosen to provide the bird enthusiast with an opportunity to view some of the impressive list of birds to be found throughout the district and for the tourist generally to gain an introduction to the diverse and picturesque habitats of the region. This web site will guide you through the various routes and tell a little about each one. Visitors are advised not to undertake these routes in times of very high or extreme fire danger.

Permission must be gained from the local National Parks and Wildlife Service before commencing Punks Trail (Bird Route 8) or entering any other part of the Pilliga Nature Reserve. NPWS can be contacted on 02 68421311.

The Pilliga State Forest is a challenge to bird enthusiasts and seasoned ornithologists alike. Drives in the forest are unlimited. Most roads are clearly sign posted, but ***Please follow the map***. It spoils your day to get lost. Remember, that many of these roads are bush tracks and drive with caution. Forest maps are available at the Coonabarabran and Narrabri Visitor Centres and the Baradine Forestry Office. The back of the forestry map contains some interesting information about the forest and it's history.
