BOOKS:

Observing the Caldwell Objects, by David Ratledge

The original and still the best book on the Caldwell Objects

Seen the Messier stuff? □ Been there? □ Bought the T-shirt? □ At last a book of new objects for observers, photographers and CCD imagers is here. □ Official launch was Astrofest2000 where it proved to be the fastest selling book and a runaway success. □ It is still the most logical book on the Caldwell Objects with every one detailed and in numerical order! □ ISBN 1-85233-628-5 Springer (London)

Deep-Sky Companions: The Caldwell Objects (Deep-Sky Companions) (Hardcover)

by [Stephen James O'Meara](#)
